## UCFRF's Lunabotics Challenge is an exciting opportunity for students and hi-tech industries!

UCFRF's Lunabotics Challenge is a hands-on experience created by NASA in support of the ARTEMIS program. Its goal is to design and build a prototype robot, capable of performing operations on a simulated lunar regolith surface. This year's qualification challenge will be held at the Florida Space Institute's Exolith Lab® at The University of Central Florida in Orlando. The arena is located inside the Exolith Lab® Regolith Bin, which is filled with Lunar Highlands Simulant (LHS-2E). The Challenge will issue invitations to the 10 highest scoring teams. The top 10 scoring teams will also be invited to the Kennedy Space Center (KSC), Merritt Island, Florida to compete on-site at the Artemis Arena located in the Astronauts Memorial Foundation's Center for Space Education Building.
